Amendment to the Abstract:

The Abstract has been amended. A revised Abstract is attached.

ABSTRACT

An EPG information display method for selectively displaying EPG information.
The method comprises providing EPG information comprising text contents and video
for one or more channels over one or more time frames, assigning priorities to the
text contents of the EPG information, deciding to display on an EPG on a display a set
of EPG information for a plurality of channels over a plurality of time frames depending
on a zoom level of the display, and selecting which of said text contents are to be
displayed according to their priorities and the zoom level. The selected text contents
are displayed on the EPG. Video for each channel in a selected time frame is also
displayed on the EPG~~wherein all or some of EPG information of a predetermined~~
~~channel and time frame is displayed, in response to a predetermined zoom command,~~
~~EPG information of channels or time frames larger or smaller in number than channels~~
~~or time frames displayed immediately before the zoom command is provided is~~
~~displayed, and in doing this, an amount of information in accordance with a degree of~~
~~zooming is selected and displayed.~~
